## **5G, 60Ghz, WiGig: Taking an axe to the trunk of the tree of life**

<https://youtu.be/CBcvIR35KRU>

Published on Apr 1, 2018

Share, download, and WARN the masses-JOE IMBRIANO on DANGERS of 5G, 60 GHz, WiGig, and how to PROTECT yourself and home with shielding, CARBON 60, and CARBONYL IRON  
<https://thefullertoninformer.com/apple-666-project-inkwell-and-agenda-21-an-expose-with-an-all-star-cast/>

This is Joe Imbriano coming to you after a lot of thought tonight. There are really important things I want to talk about. Things are very serious folks. I don't think anyone who is paying attention could disagree with that statement. What we're facing is so overwhelming however as in everything, God always provides a means of escape. You know there's more to life than our bodies, property and possessions. There's the eternal things. They're very important but that doesn't mean that we're so heavenly minded that we're no earthly good and that's the problem with religion.

01:41 Prayer ending. Victory is ours. We have the power and we have the truth on our side and we will prevail in Jesus name.

**03:02 I want to talk to you about 5G** and the frequencies that 5G uses. Most importantly I want to talk about the lies and misinformation out there. A lot of people have no idea what's going on with 5G and make no bones about what's coming, **it's a cull**. They're setting up a **kill grid** and complete surveillance society. Today is March 31st 2018 and this is Joe Imbriano, the Fullerton Informer. I'm coming to you from an undisclosed location. The information I want to talk about tonight is **60 GHz** and **Carbon 60**. What's in a number? Well there's a lot. The Wi-Fi in your house right now, there's a good chance you're watching this video through a Wi-Fi delivery system, operates on 2.4 GHz that means the **electric electromagnetic field is oscillating about two and a half billion times a second**. That's the frequency at which the water molecules in your body begin their rotation on their axis to try to keep up with this field oscillation. **They chose the water molecule frequency** specifically for Wi-Fi, and the FCC, and world wide governments have allowed for that specific frequency band to be unlicensed meaning anyone can broadcast on that frequency as long as the device complies with FCC regulations in terms of harmful interference, broadcast power, etc. Ladies and gentlemen **they don't open up a frequency band unless they know it can hurt you**.

05:29 Try getting the television license. Try getting a radio license to broadcast on one of the channels on the FM dialer. Try getting a radio a radio license to broadcast on one of the AM stations. Try getting a television broadcasting license. You can't get it folks.

05:48 These frequencies they're opening up the spectrum in, are **weaponized frequencies** and that's the problem, and they're putting in the transmitters everywhere. Now there is **no 5G being rolled out right now** in the majority of the United States. It is coming to a handful of cities like **San Francisco**, parts of **Los Angeles**, and **Austin Texas** that I know for sure. It's not there yet though so if you're seeing pictures on the internet of people saying that this is 5G and these antennas are 5G antennas they're not. **It's not here yet** ladies and gentlemen. *The Gold Rush has begun, the stakes have been driven into the*

*ground, but the mining has not begun. The antennas are not in position yet. What they have to do before they put the antennas in position is they have to get everything else out of the way.* Now the trees are a problem because these signals are being broadcast in the millimeter band part of the electromagnetic spectrum. They don't penetrate very well, they don't travel very far, and that's why if you look around, and if you've been scratching your head lately as to why cities are cutting down beautiful mature trees all over the United States in the metropolitan areas, it is in preparation for the 5G rollout. **Trees are a problem b/c they block the signal.** If you'll notice all the new developments in your city, and in any other city out there, is all high-density, 5-6-8-10 stories, NO trees. Sure there'll be a central area where there will be some grass but if you'll notice they're going away from the foliage. If you'll notice a lot of the **trees are also being burned** up in fires that are the result of a combination of weather modification and directed energy weapon strikes.

08:38 I know for a fact based on my observations from the footage and the pictures in from the fires in California that those were not your normal fires. The temperature at which things burned was way too hot. Too many things got vaporized that had no business being vaporized. I've been around plenty of campfires and I know what happens when you put certain things in a fire pit. We've burned a lot of things in the desert and I know how hot stuff can get. **You can't vaporize a car.** You can't vaporize a fireplace. Folks they're burning everyone off the land. **They're driving everyone into the compact cities** and in the compact cities there will be millimeter wave and microwave emissions everywhere. I was reading a document tonight from 1986. It's a NASA document about 300 pages and it talks about how they were going to be using 60 GHz for inner satellite communications, and there's some interesting statistics in this report. They were talking about how they would be able to broadcast 68,000 kilometers with 10 watts, and yet we know for a fact that the millimeter wave emissions at 60 GHz are not going to need just 10 watts. They're going to need a lot more power than 10 watts, and they only travel about 500 feet. So how NASA can get 20,000 kilometers out of 10 watts. the reason I'm bringing this up is because there are **lies everywhere** and so much disinformation about all of this stuff and I want you to understand something folks. **It doesn't travel far and it doesn't penetrate well.**

10:56 There are ways **they can get these emissions into your home** and through your walls with **beam forming**. There are ways you can stop this. These emissions are not only a kill grid but a complete surveillance medium. They will be able to have 3D imagery of everything once this is completely rolled out. The millimeter wave deployment, the new 5G is being sold to you as an incredibly rapid download speed, new technological advancement and I keep hearing about how you'll be able to download a two hour movie in 30 seconds. Is it really that important to download a movie on a stupid phone? Is it obvious to you that you're being fed a line or a crock to get you to accept what they want to sell you as a miracle? Always be suspicious. When they come out with some new fangled invention they say you have to have, that you can't live without, and how it's going to be so great for you because **these people that are making these decisions are very evil** and they know what this stuff does. They have studied it for decades. I've studied this extensively for years. I understand what these emissions are capable of doing. That is why for years I have fought and lobbied school districts, municipalities, cell towers and cell tower companies from full deployment in my city, which is Fullerton California.

I can't tell you how many evenings I spent at a city council meeting or at a school board meeting in an empty room talking to people on a school board, or a city council who ignored everything I said, who could care less about the truth in my statements because most people in political office are extremely stupid and extremely corrupt and that's why they've been chosen for those positions, and that's why they've been installed in those positions but that doesn't detract from the necessity of activism and telling the truth.

13:31 I had to present the information through the proper channels, in hopes that it would sink in and action would come that would be favorable in the best interests of the community and the children. Well that is not the case ladies and gentlemen. I was able to delay quite a bit of deployment in the high schools but now it's all in. We fought tooth and nail to stop the 5G rollout in the city of Fullerton along as with other cities, as basically given carte blanche to these wireless companies to come in and choose whatever pole they want to put these things on, whether it be a light pole on top of the LED lights or power poles or whatever. It's coming. But there's one thing as a Christian that we never lose and that is hope because even though we're under assault and even though we're under attack there's always a way out because God always provides a way out. You see there are ways that you can shield your home and there are ways that you can shield your body and I want to talk about how to protect your body from what's coming.

15:00 The people implementing these technologies at the very, very top are **eugenicists**. Their goal is to herd everybody into the compact cities and slowly kill them; **make people sick, weak, lazy, stupid, corrupt and make them their own**. That's the plan and it's being accomplished already. **Municipal water is treated** with sodium fluoride, with bromine, chloramine, chlorine and a myriad of other halide compounds that are called disinfectants. They have a license to poison your water. Pour it in a goldfish tank and see what happens. There's a **solution, reverse osmosis filtration**, inexpensive and extremely efficient. There's also a **war on your blood stream** i.e. forced vaccinations. The way out is a two letter word: NO. Don't take the vaccines. If you have children the only way to avoid the vaccinations is to home-school them. **None of the vaccines have been tested** for impairment of fertility, mutagenic potential or carcinogenic potential. No one in their right mind who just heard what I said should put those in their children. If you're in a position where you can't home school pray about it, and find a way to get it done, or find a way to say no, or find a doctor that will write you a medical exemption because I'm telling you right now folks they've had decades and decades to hone the technology, the biotechnology, to put things in those shots. They can kill you. It can make you sick. They can make you sterile. Do your homework. There's a **problem with the food**. We know the food supply is extremely tainted and adulterated but there are ways to stay healthy. You should **eat things that grow on plants and trees** and that come from animals, come from living things in preferably their wild form, their natural state. Not the stuff in cans or boxes or powders or mixes. All of these things will make you sick and that's part of the plan. The medical system is also a big part of this. The **allopathic medical system** has created a system by where they **manage disease and cure nothing** and they mine your health until you're dead. They make all kinds of money off your insurance policy, run tests on you, drug you, give you more tests, more pills, more creams, more injections, more false hope, and it always ends up leaving you defenseless and sick and dying.

18:40 The solution = **stay away from doctors**. If you have an automobile that doesn't have any engine lights on, check engine lights, or warning lights on, do you take it to the mechanic to see if there's anything wrong with the car? Of course not because if you take it to a crooked mechanic they'll break something and say you need to have it fixed. The **medical system is like a crooked mechanic** ladies and gentlemen. You go in there, there's nothing wrong with you, and they'll still find a way to give you some sort of a medication because they have designed all of their protocols to basically encompass everybody that has a pulse and that is breathing to be in need of medication. They've lowered all the thresholds on things that are actually normal and trying to tell you that you're sick, and you need to take these pills or these drug. It's a scam folks. It's about making money and killing people. Don't go to the doctors. Don't take your children to the doctors.

19:37 **Microwave emissions** they are a problem. You see this microphone? It's got a wire on it. **Hard wire all your connections** in your home. It's not that hard to do. Use **aluminum screens on your windows**. That blocks the signals from coming in the low E glass. On some of the dual pane windows it also blocks the signals but not as effective as the aluminum screens. You can use RF shielding paint in your home and it's expensive. It has to be done properly. It has to be grounded but it does block the signals. **These signals that come through your home 24/7 are damaging your health**, they affect fertility. They affect: the mitochondria in your cells, your DNA, your nervous system, your circadian rhythm, your heart, your heart rate. They affect your mood, your ability to concentrate, your cognitive functions, your brainwaves, your brain. Your body is an electrochemical creation. It must be treated as such and it must be protected from unnatural electromagnetic fields that we're being bombarded with. The **current microwave levels in our environment** are trillions of times the background levels our parents were exposed to as children. There were no microwave emissions 50 years ago in the environment. NOW they're everywhere and what is coming is a new breed of radiofrequency, **torture radiofrequency**, poison. They're increasing the frequency. They're going up the ladder so to speak and they're going to 60 GHz for the new Wi-Fi. This new Wi-Fi is called **WiGig** and it's coming.

21:55 The goal is to continue with the towers in place and continue broadcasting on those frequencies but they're also going to be utilizing a **new type of communication** system that's going to involve the placement of small cellular antenna all over the place, on the public right-of-ways, on top of schools, light poles, telephone poles, power poles, public buildings. You are going to see these little boxes. They come in different shapes and different sizes but they're basically going to **look like the top of a shoebox**. They're going to be **rectangular** and they're going to be **connected to poles** or buildings in your neighborhood outside your home. These frequencies they're going to be broadcasting on will be in the **millimeter wave spectrum**. These waves don't travel far and don't penetrate very well. As far as the buildings, they're going to **force you** to have some sort of a **relay system in your home**, to where you pick up the signal and rebroadcast it through your home, and this is where we have them. This is one of the ways that you can defeat this. **You don't have to go wireless in your house**. You don't have to have a relay system in your house, and you don't have to have a WiGig system in your home. The 60 GHz frequency has been chosen for a specific reason. It **is the frequency of oxygen molecule absorption**. It's the oxygen molecule frequency that is the frequency that the oxygen molecules absorb the radio frequency energy. Why is this so significant because it's so **demonic** and it's so evil. The oxygen molecules have electrons that they share with each other. Oxygen is a diatomic molecule. What we breathe are two oxygen molecules stuck together with these electrons that they share. When oxygen is hit with radio frequency energy at 60 GHz it affects the orbital properties of those shared electrons. It is those shared electrons that bind to the hemoglobin in our blood that is a magnetic compound in our body, in our blood cells. Hemoglobin is a very complex magnetic compound. It is a ferromagnetic compound. When you alter or interfere with the orbital spin properties of diatomic oxygen's electrons you interfere with the miraculous gaseous exchange in our lungs where the oxygen is absorbed into the bloodstream, and at the same time is being transported through our body, the carbon dioxide and water vapor is being expelled from our bloodstream into our lungs and breathed out. It's a miraculous function that we don't even think about. It's just happening constantly while we're alive. They're taking the axe to the trunk of the tree ladies and gentlemen. Oxygen is life. **They're going to be poisoning us with a frequency that affects the oxygen molecules** and this is by design. By their own admission they tell us that these emissions don't travel far and they don't penetrate very well, so that requires that they locate these micro cell antennae about every 500 feet in the cities because the air in the atmosphere will absorb and block the frequencies. Why

would they use that frequency if it doesn't travel very far and there's so many things that will interfere with the wave propagation? I'll tell you why in folks. **It's a weapon.** It's part of the agenda to kill us off and make us sick, and by the way I believe the **disease X** they've been talking about, will be a direct result of radio frequency exposure for millimeter wave emissions. It will be forced on the population. What's really scary about the millimeter wave exposure is that there are **no devices on the market to test for its presence** or its power level right now. You can get a pretty good RF meter for about \$200 and you can go all the way up to 8 GHz and you can see what is being broadcast and at what power level. NOT with this new stuff. **So what do we do?**

27:40 Well we obviously have to realize that when they try to tell us that there's this new outbreak, and they've just discovered this new outbreak, and they don't know what causes it, and it's this new disease, and they think they have a new vaccine for it, **don't take the vaccine** because it will be from the radiation from these towers. You need to find a way to **shield your home** and don't bring these dangerous communication systems into your home. Do not go for the WiGig. **WiGig is a weaponized Wi-Fi system.** It is coming. The phones are all going to be using WiGig for Wi-Fi communications. **All the new Wi-Fi is going to be WiGig, 60 GHz that's the oxygen molecule absorption frequency.** Listen to me ladies and gentlemen. I'm urging you to listen to me. This is extremely serious.

28:34 Now, I have a bachelor's degree in chemistry from UCI. I have a bachelor's degree in biological science from UCI. I have all my textbooks from college, I never gave one of them back, and I never sold one of them. I purchased them when I was in school and I kept every one of them, and I still read them. It is amazing when I look back through these books what they did not teach us. Now, I was a biological science major that's a life science discipline. I had classes that studied everything from cellular metabolism all the way up to how organs work. That's just how it is, that's what they teach you, and with chemistry how things fit together like an erector set, and some biochemistry to see how the erector set interacts with some of the living organism and tissues. But you know what they never taught us, ever, **magneto biology.** That field of study I had to teach myself through the information that I had to pursue from outside of the United States because magneto biology is not a field of study in any university in the United States. It's by design. I want to talk to you about **your best defense** against the coming 5G and millimeter waves.

30:14 Aside from shielding your home, and aside from not bringing any new generation wireless systems into your home that utilize millimeter waves for communication, **no WiGig devices, no 60 GHz Wi-Fi systems,** you need to have an understanding of what natural compounds are readily available for human consumption that will give you protection, not 100 percent protection, but enough to keep you alive to where you won't succumb to the illnesses that these systems are going to induce in the population. Another **thing that we are being robbed of is vitamin D.** The chemical spraying in the upper atmosphere that blocks the Sun, and you know exactly what I'm talking about. Some people call them chemtrails, some call it geoengineering, but it's really chemical spraying of metallic nano compounds to affect the light frequency that's coming from the Sun. There is a **war on vitamin D** and that war on vitamin D is being waged through the **sale and marketing** of sunglasses, **UV blocking** contact lenses, UV blocking windows, UV blocking sunscreen, UV blocking eyeglasses, UV blocking products, UV blocking window film. Ladies and gentlemen **you have to have UVA and UVB to survive.** It has to enter through your eyes and that triggers a process in your body where vitamin D is produced. You cannot absorb the synthetic vitamin D that they're dumping in the toxic milk. **You must get sunlight exposure.** I don't care if you live in Billings Montana, you need to go outside and look at the sky and look into the daylight. You must have at least an hour a day of sunlight through your eyes. I'm not telling you to stare at the Sun. I'm telling you to go outside in the light.

Vitamin D production is directly impacted by millimeter-wave exposure. Millimeter waves specifically **60 GHz also destroy your body's ability to produce vitamin D**. That's another part of this agenda. In addition these millimeter waves affect your eyes ability to absorb UVA and UVB, as well as your skin's ability to produce melanin and vitamin D. Your body is under attack from these emissions once they're going to be rolled out. Your **defense against a radiofrequency attack** on your body can be accomplished through the **consumption of ferromagnetic materials**. One of the **best things you can** take is a form of iron called **carbonyl iron** and in case you didn't know it's **a microwave absorber**. That's what they paint the stealth-bomber with. How radar works; as they send out a beam of energy and if it bounces back off an object, and comes back to the transmitter, it maps out an image or a ping of an object, so it detects it. Radar absorbing ferromagnetic compounds such as carbonyl iron are microwave absorbers.

34:05 Your brain has ferromagnetic compounds in it as built-in protection. Your brain is full of a compound called **magnetite**. It absorbs at one of the highest peaks at around 12 GHz and that's the first generation of 5G that's coming out. You see **they're going after the frequency that your brain** is designed to shield from but they're going to really ramp up the amount. **You must fight back with ample amounts of iron, iron oxide, carbonyl iron**. Your body produces magnetite through bacteria in symbiotic relation with your body. Your brain is the computer hard drive of your body, and it is an electrical chemical, electrochemical system that is so complex that after all these years of studying it we still don't fully understand how it works. But we do understand what's in it. What it's comprised of is mainly of cholesterol, and that's why you should **never take cholesterol-lowering drugs because they give you Alzheimer's**, lower your brain function, and actually shrink your brain. So while I'm on this, don't take any cholesterol reducing medications. Go for a walk and get plenty of exercise, keep eating bacon and eggs that's not the problem. One of the biggest problems with cholesterol is in plaques in the arteries, which is actually from the **chlorine inhalation from showers, and from municipal water**. So **get a shower filter** and that'll stop a lot of the pitting in your arteries because that's what's causing it.

36:07 Now, there are fullerene compounds in addition to what I've just mentioned. **Carbonyl iron** is a supplement you can purchase. I strongly recommend **if you're pregnant that you buy it because it will prevent your baby from having autism**. Most of the autism today is a direct result of electromagnetic exposure and the autism epidemic that we're seeing is extremely prevalent in anemic mothers. **The children do not have enough iron**, enough magnetite, enough iron in the blood brain barrier **to block the microwaves that are opening the blood-brain barriers and allowing metals to get in there**, and once the microwaves hit these metals you have electrical discharges and in some cases relatively high voltage even though the power levels coming from the sources are very low. I'll give you an example.

37:02 You have a typical microwave oven. It may run 12 or 1300 watts and it takes about 110 volts out of the wall to run that thing. If you stick a fork in that microwave oven, understanding it's a resonant cavity, and it's designed to magnify the waves, but you'll still get enough electricity, enough voltage off the tip of that to result in what's called the dielectric breakdown of air, close to a million volts come off the tip of that fork off 110 volt appliance. So if Wi-Fi is a watt and a half and there's all kinds of these metallic nano compounds that are being sprayed on us, getting trapped in your brain because the microwaves systems that are in place like the Wi-Fi systems in your cell phone, and the cell towers are actually **opening your blood brain barrier, you're letting the metals in your brain and trapping the metals in there**. Once those metals are trapped in the brain and they're hit with these emissions they arc, and they cook, and they destroy, and they overload the circuitry. I'm oversimplifying it here but that's what's going on. **If you're**

**pregnant** you need to take carbonyl iron as a supplement. That form not ferrous sulfate, carbonyl iron. Now, now back to protection from the 60 GHz assault that's headed our way

38:22 **Carbon 60**. It's a fullerene compound and for lack of a better description, picture a soccer ball made out of straws, hollow, a lattice, with hexagon shapes in the face. Just picture a soccer ball. **Carbon 60 is something you can take as long as it's in oil, not in water**, olive oil, sunflower oil. Look it up. It's out there. It's for sale, it's cheap, and it's safe. Carbon 60 has remarkable properties. It has remarkable electromagnetic properties although its carbon it doesn't really act like carbon. It welcomes electrons. **It is an electron acceptor**. It'll take what's coming at it and it'll absorb what's coming at it and it will diffuse what's coming at it. Another thing that's really amazing about carbon 60 is its ability to encapsulate metals in the body and unlike chelation, carry it out of the body and almost completely protect from having any reactivity biologically speaking while it's being carried out. Whereas some chelation you still have the metal sticking off the molecule and it still has the ability to react with other biological compounds in the body while it's being carried out of the body but carbon 60, these fullerene compounds, work wonders with getting metals out of your body. You see ladies and gentlemen **we're being poisoned with metals** intentionally. If you look at what's for sale in the stores the **cookware** is aluminum, the **foil** is aluminum, the **cans** are aluminum, and what's **falling out of the sky** is aluminum. The **antiperspirant** is aluminum, the **baking powder** is aluminum. I can't begin to emphasize enough how the intentional placement of metals into our body fits into this. I know you can't stop breathing the air but **you can stop putting metals into your body**, stop drinking out of cans, stop using aluminum cookware, stop using aluminum based antiperspirants, stop using baking powder with aluminum in it. Read the labels, read the ingredients. Get the microwave emissions out of your home. **Wi-Fi opens up your blood-brain barrier**, allows metals to get in there and then they get stuck in there, and then they get hit with the radio frequency fields that carry energy, and they create voltage discharges inside your brain. That's why, if you have your cell phone up to your head for a long time you start feeling kind of foggy and you feel weird. You know what I'm talking about? Most of you probably don't even know what it feels like to feel normal. It's going to be one step at a time ladies and gentlemen. I've covered a lot of ground here. I'm not so sure all this is going to sink in on the first go around but you must understand what I'm telling you, and you must listen to what I'm telling you, and **you must tell others** what I'm telling you because you're not going to hear this information anywhere else. No one has the information because it's not out there. This information is very complex and it's been purposely hidden.

42:50 Now, you also have people that are in a movement supposedly against the wireless onslaught that are purposely not discussing what I've just told you because they're part of the system, and they're making sure that no one understands the solutions. **They want you to be afraid**, they want you to feel powerless, they want you to feel paralyzed, so you won't respond and rescue yourself. One of the most beautiful things about being a Christian is that we have hope and **God always provides a means of escape** and we have the wisdom to find it. That's why I opened this in prayer because we need to seek His direction, we need His wisdom, we need His courage and we need his son Jesus Christ because without the Son we have no life. You see ladies and gentlemen, **the people who are doing this to us they worship the devil**, they worship Lucifer. Turn on the Super Bowl and watch the halftime show, turn on MTV and look at all the Illuminati symbolism, look at all the ritual sacrifice propaganda, the reenactment of the days of old where the demons were on the planet. Folks all the music and all the movies are richly symbolic of things that are completely diametrically opposed to God, and the good things He has given us and provided us. Everything is being carried out in a ritualistic fashion to hurt us, and to kill us, and to destroy us. Look at everything ladies and gentlemen. You think a lot of these things are for

your pleasure they're not. They are **a dirty trick to deceive you and to destroy you**. You see 95% of the United States is rural open space and they keep telling us that we're overpopulated. That's not true ladies and gentlemen. **They want you in a compact city** so they can control what you eat, what you drink, what you think, what you breathe, what radio frequency you're exposed to, and **ultimately your soul**. With the screens everywhere, with a constant barrage of evil programming you to love and accept it. Turn it off turn! Turn off your television. Don't listen to that music anymore. If you want to continue listening to the music look up the lyrics and read them, and then come back and tell me if you want to listen to that music anymore. **Protect your children from weaponized iPads** that have a slot antenna at the bottom that are actually sterilizing your children. I've gone into this on previous videos but the iPad is a weapon. It is a fertility weapon designed to sterilize children. Microwave emissions have been shown to destroy ovarian reserves in rats. If you go to Apple 666 Artemis or Wi-Fi dangers.com you can see the studies I reference in the symbolism. The hours late ladies and gentlemen but that doesn't mean that the sun's not going to rise again because the beauty of it all is that tomorrow is Easter and yes I know you're going to tell me it's a pagan holiday. At least once a year folks we have to celebrate the resurrection of Jesus Christ and I don't care what you want to call it. I understand that paganism was blended with Christianity and that's where we got the Catholic Church and that's where we got all these weird festivals. I know all that but we must give thanks to God for the victory over the grave, and the courage to carry on, and the wisdom to guide our paths. This is Joe Imbriano hoping that you will take this information to heart whenever and wherever it may find you. In Jesus' name.
